## Is Your Home Making You Sick?

**Doug Corbridge, Owner of Premier Home Inspection, has partnered with Environmental Safeguard Professionals, Inc. to provide a full suite of healthy home inspection services by earning the coveted**

**Certified Environmental Home Inspector (CEHI) designation.**

Billings, MT - April, 9, 2009 - "The air in our homes and workplaces may be more polluted than the air outside. Poor indoor air quality is implicated in asthma, allergies, fatigue, headaches, heart conditions, cancer and other common ailments." - World Health Organization and US Environmental Protection Agency, 2008.

Testing is the only way to know if your indoor environment can be harmful to your family's health and adversely impact the value of your #1 investment, your home. "In today's economic environment isn't the cost of an inspection worth your peace of mind for your family, your health and your home by conducting a Certified Moisture Investigation?" asked Mr. Corbridge. The standard certified moisture investigation will cover up to 203 checkpoints on a property. CMI investigations are the industry's best in class moisture inspection reports. This consumer friendly report includes recommendations, a color-coded summary page and detailed photos of any areas of concern. Your home can earn a Healthy Assurance Certification with a proactive, industry supported

Annual Healthy Living Maintenance Program. The annual inspection detects problems before costly repairs are needed and your family's health is impacted. Only CEHI's can give your home a Healthy Home Assurance

Certification. Environmental Safeguard Professionals qualified CEHI's inspection services have earned the trust of builders, insurance companies, lenders, realtors, property managers

and schools.

CEHI's are trained and certified to provide the Next Generation Of Inspection Services for property transactions as well as affordable Healthy Living Maintenance Programs to protect

your family, your health, and your home. "I think almost every homeowner would agree that their family and home are worth the small investment. Early detection is the key. Premier Home Inspection can provide that. CEHI inspections have already been welcomed by the Building and Mortgage Banking Industry, as well as the PIA, the insurance industry's largest professionals organization." said Corbridge.

Premier Home Inspection is owned by Douglas Corbridge of Billings, MT. Until receiving the coveted CEHI designation, Premier Home Inspection performed traditional functional home inspections, which remain core to their business model. Corbridge has worked in the construction and service industries for over 30 years. Premier Home Inspection Services now include: Traditional Home Inspection, Certified Moisture Investigation, Healthy Living Maintenance Programs, Environmental Testing, Allergen Screening, Neighborhood Environmental Reports, Radon Testing, and soon HERS Environmental Energy Audits.
